

POINT UNIVERSITY IN LANETT, AL

In need of a dormitory building to house student athletes, Point University purchased a used modular building from Satellite Shelters. The original 186' x 130' 24-plex building was completely renovated to fit their needs. Just five weeks after the project was awarded, the building was prepped and ready to ship. The redesign added over 1,300 linear feet of interior walls, 40 solid core interior doors, and an entire redesign of the sprinkler system. The building was also re-certified to meet Alabama state codes.

The renovated building now houses 36 two-person dormitory rooms, several counselor rooms, business offices, and 8 bathroom and shower modules. By utilizing a used modular building instead of building a new custom dormitory building, Point University saved time and money. Today, this modular building is located less than 200 feet from the main campus and houses 72 student athletes.

PROJECT QUICK FACTS

- 70 day modular renovation
- 24,000 square feet
- 36 two-person dormitories
- 8 bathroom/shower modules
- Offices and counselor rooms
- \$500k savings by renovating modular
